Proudly Made in India
Supporting the Make in India Initiative.

Welcome to Meditek Medserv Pvt. Ltd.

Designed for Safety. Delivered with Care.

Meditek Medserv Pvt. Ltd., formerly known as Meditek Agencies, was founded in 2016 by Mr. Ashish Gore (CEO) and Mrs. Priyanka Ramteke (COO) with a focused vision to bring precision, safety, and innovation to diagnostic imaging.

Rooted strongly in India and guided by an expanding global outlook, Meditek Medserv Pvt. Ltd. offers a comprehensive portfolio of high-quality medical solutions. Our expertise spans Contrast Media, Injectors, Disposables, MRI Compatible Accessories, DICOM Printing Solutions (film and paper), Radiation Protection Accessories, and AI Powered Multi Industry Asset Management Platform — delivering end-to-end solutions that empower healthcare professionals and organizations to perform at their best.

Driven by the core values of reliability, innovation, and customer-centricity, Meditek Medserv Pvt. Ltd. is proud to be a trusted partner to healthcare providers.

"Passionate about care"

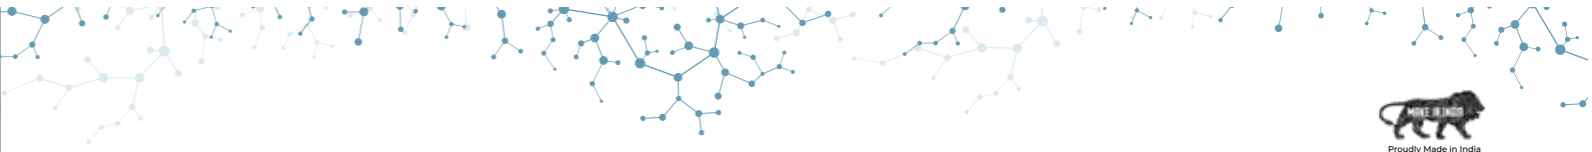

Vision That's Shaping Healthcare

Our vision is to become a known leader in Healthcare by consistently delivering innovative and high-quality products that enhance diagnostic precision, patient care, and operational efficiency in healthcare institutions worldwide.

Mission to Deliver Excellence

Our mission is to deliver innovative and reliable medical solutions with a strong focus on the imaging segment, including Contrast Media, Injectors, Disposables, MRI Compatible Accessories, DICOM Printing Solutions (including film and paper printing), Radiation Protection Accessories, and an AI-powered Multi-Industry Asset Management Platform that empowers healthcare providers with accurate diagnostics and enhanced patient care.

Leadership that Inspires

A leadership team committed to excellence, integrity, and advancing healthcare standards.

Mr. Ashish Gore

Founder & CEO

A visionary leader having extensive experience in the healthcare industry & leadership position.

Mrs. Priyanka Ramteke

Co-Founder & COO

Operations expert focused on delivering excellence in healthcare solutions and unmatched customer service.

Showcasing Healthcare Excellence

A comprehensive range of healthcare solutions designed to support accurate diagnosis and efficient clinical workflows.

Ai Powered Multi Industry Asset Management Platform

Our Contrast Media Range

X-Ray Contrast Media

Medi-CT (Iohexol) – 300 mg

Pack Sizes - 50ml, 100ml, 200ml

- Non-ionic contrast medium
- Low osmolar formulation
- Excellent patient tolerance
- High contrast enhancement
- Suitable for all CT procedures
- Also Available In Polypropylene (Soft Pack)

Medi-CT (Iohexol) – 350 mg

Pack Sizes - 50ml, 100ml, 200ml

- High concentration formula
- Enhanced image quality
- Rapid injection capability
- Optimal for vascular imaging
- Extended shelf life
- Also Available In Polypropylene (Soft Pack)

Isomed (Iodixanol) – 270 mg

Pack Sizes - 50ml, 100ml

- Iso-osmolar formulation
- Excellent safety profile
- Reduced adverse reactions
- Suitable for sensitive patients
- Also Available In Polypropylene (Soft Pack)

Isomed (Iodixanol) – 320 mg

Pack Sizes - 50ml, 100ml

- High concentration iso-osmolar
- Enhanced image quality
- Excellent patient tolerance
- Optimal for complex procedures
- Also Available In Polypropylene (Soft Pack)

MRI Contrast Media

Pentagad (Gadopentetate Dimeglumine)

Pack Sizes - 10ml, 20ml

- Linear gadolinium-based
- MRI contrast enhancement
- Proven safety profile
- Multiple volume options

Macro MR (Gadoterate Meglumine)

Pack Sizes - 10ml, 20ml

- Macrocyclic structure
- Enhanced stability
- Superior image quality
- Excellent safety profile

Medibutrol (Gadobutrol 1.0 M)

Pack Sizes - 5ml, 10ml, 15ml, 20ml

- High concentration formula
- Reduced injection volume
- Enhanced image quality
- Multiple volume options

Oral Contrast Media

Gastro-Oral (Diatrizoate Sodium)

Pack Sizes - 30ml, 100ml

- Oral administration
- Gastrointestinal imaging
- Safe and effective
- Multiple volume options

Injectors & Consumables Range

Medlyf-D

- Dual syringes provide saline flush capability
- Saline flush controls contrast agent timing and reduces interferential shadows
- Large color touch-screen for intuitive operation
- Clear and intelligible operate screen
- Flexible injection design from simple 1 phase to complex 8 phases dual syringe injection
- Elaborate assistant tray for fluid bottles and connector tubing placement
- Enhanced pressure makes contrast agent denser for stronger signal

Specifications

- Flow Rate programmable: 0.1 to 10 ml/sec
- Pressure Limits Programmable : 100 to 300psi
- Injection Capabilities : 1 to 8 phases

Medlyf-S

- Highest delivery rate: 9.9ml/s, lowest: 0.1ml/s
- Large range of rate satisfies all enhanced CT scan requirements
- One to four phases injections meet variety of CT injection needs
- Large-size disposable syringe meets various volume requirements
- Highest pressure limit increases safety of process
- Relay input/output interface connects to different CT scan facilities
- Small diameter pipe tube reduces contrast agent waste
- Long-distance control box for monitoring in control or scanning room

Specifications

- Flow Rate: 0.1 to 10 ml/sec in 0.1 ml/sec increments.
- Pressure Limits Programmable: 100 to 300 psi
- Injection Capabilities: 1 to 8 phases

Injectors & Consumables Range

Medlyf-Angio

The Medlyf-Angio Injector is designed for multiple imaging applications, including coronary angiography, ventriculograms, & aortograms. It can also be used in digital gastrointestinal diagnostics and peripheral blood-vessel imaging. Additionally, it can inject fluids during CT contrast-enhanced scans.

Specifications

- Large color touch-screen makes operation more intuitive and simplifies injection planning and process control
- Clear and user-friendly operating screen
- Multiple, safe, and reliable ports ensure compatibility with different imaging equipment

Medlyf- MRI

- Excellent performance; the 8 Amp-hour battery offers longer scan times between charges
- Independent KVO procedure
- On-screen tutorial simplifies the setup procedure
- Flexible power management with an integrated continuous battery charger option allows either full, non-tethered battery operation or continuous battery charging through an AC power connection — switch between battery and AC power in seconds
- Mobile configuration available for MR trailers
- Multi-phase injection control

Specifications

- Programmable flow rate: 0.1 to 10.0 ml/sec in 0.1 ml/sec increments
- Pressure limit: Factory-set, not to exceed 350 psi
- Injection capabilities: 1 to 8 phases

Disposable Range

DICOM Paper Printing Solutions

(Go-Green Initiative) 

OKI 8431 A3/A4 Printer

DICOM Embedded Paper Printer

ES8431 DM by OKI, you can now print your medical imaging cost effectively on standard media formats in vibrant, HD colour and in sizes up to A3. From nuclear medicine to scans (eg MRI, CT) and ultrasounds, these images can now be easily printed for your own use or to provide a copy for your patients and clients to take away with them.

Description: The ES8431 DM is a very small footprint A4/A3 DICOM imager. Recommended for CR, nuclear medicine, ultrasound, CT, MRI. Imaging Technology: CMYK toner-based engine with tandem, technology. Light sources are LED arrays @ 600 dpi with multi-level capability.

OKI

OKI

OKI C941M. DICOM Film & Paper Printer

Print Both Media – Film and Paper

C941-M is equipped with professional image output software, which can easily realize the output function for black-and-white and color images on the same machine. The color medical images output by OKI C941-M are delicate and accurate, rich in color and high in saturation.

- Supports custom media sizes up to 330 × 432 mm
- Can be loaded in a bright room and supports up to 5 film trays for easier operation
- 4.3-inch color LCD display for clear, at-a-glance printer information
- Front-access consumables for quick replacement and reduced downtime

DICOM Paper Printing Solutions

Laser Imager Dry Pro 873

The Laser Imager DRYPRO Model 873 involves heat processing in the imaging step. Konica Minolta is aggressively taking eco-friendly technology. In the usual printing operation, we managed to achieve 30% lower electricity consumption compared with previous types, realizing eco-friendly ECO dry.

- Laser source: Semiconductor laser
- Film size: Selectable from 14"x17" / 14"x14" / 11"x14" / 10"x12" / 8"x10"
- Films to be used: Dry medical films, by Konica Minolta
- Image format: 1, 2, 4, 6, 8, 12, 15, 20, 24, 25, 30, 35, 36, 42, 48, 54, 56, 63, 64
- Input: Maximum 16 ports

AI-Powered Asset Intelligence

Meditek Medserv Pvt. Ltd, in partnership with Arcmedix

Meditek Medserv Pvt. Ltd has partnered with Arcmedix to bring an AI-powered, multi-industry asset management platform that enables organizations to manage the complete asset lifecycle from procurement and maintenance to optimization and retirement with real-time visibility, predictive insights, and measurable performance.

Key Capabilities;

- Centralized asset data with RFID & NFC-enabled tracking
- AI-driven predictive and preventive maintenance
- Work order, inventory, and lifecycle management
- Real-time dashboards, alerts, and analytics
- Scalable operations across multiple sites

Business Impact:

Higher uptime | Reduced maintenance costs | Improved asset utilization | Faster audit & compliance | Data-driven decision making

Best-in-Class Radiation Protection Accessories

Lightweight Comfort, Guaranteed Shielding

Cutting-edge technologies like X-RAYS, C-ARM, and Cath Labs emit ionizing radiation, which can pose risks to healthcare professionals. Our radiation protection accessories are designed to shield you from all types of radiation— α (Alpha), β (Beta), and γ (Gamma) rays. These rays can deeply penetrate the body, potentially affecting organs and tissues. With our gear, you stay protected without compromising comfort or mobility.

Best For Radiation Protection

Flexible, Non-Tearable, Durable

Multi-Layer Protection

Pb-Free Aprons

Sustainability with Purpose

Respect our social and physical environment and protect it in compliance with environmental laws and regulations at all levels.

Our Core Values

To become a known leader in Healthcare by consistently delivering innovative and high-quality products that enhance diagnostic precision, patient care, and operational efficiency in healthcare institutions worldwide.

Integrity

Conducting business with transparency and ethics

Collaboration

Fostering meaningful partnerships in healthcare

Innovation

Driving continuous improvement in healthcare solutions

Sustainability

Embracing responsible practices for lasting impact

Customer Focus

Delivering solutions that respond to real-world clinical needs

Your Trusted Partner For Healthcare Solutions

Hospitals

Supporting hospitals with reliable medical & diagnostic solutions for accurate procedures and efficient patient care.

Diagnostic & Imaging Centres

Providing precision-driven products that enable clear imaging, accurate diagnosis, and smooth workflow operations.

Clinics & Healthcare Institutions

Delivering dependable medical solutions that enhance everyday clinical efficiency and patient safety.

Why Choose Meditek Medserv Pvt. Ltd.?

Built on Quality Chosen For Reliability

Meditek Medserv Pvt. Ltd. stands apart through its commitment to quality, reliability, and clinical performance. With a comprehensive portfolio of diagnostic imaging and medical solutions, we ensure every product meets stringent standards of safety and compliance.

Our customer-focused approach, dependable supply network, and industry expertise enable healthcare providers to operate with confidence. By combining innovation with consistent service support, Meditek Medserv Pvt. Ltd. delivers solutions that professionals trust for accurate diagnosis and efficient healthcare delivery.
